

Themes

Description

Use themes to customize the appearance of a group of webcasts.

After creating a theme, you can assign it to any number of webcasts you create.

Where required, you can alter the theme in this section.

All webcasts assigned the updated theme will then be updated.

Steps

1. To create a theme, click the "Themes" entry in the navigation panel. A list of all previously configured themes will appear.
2. Click the [Create] button to open a new form, or click on an existing theme to modify a form.

| Slidelister navigation buttons | |
| Player accent color | |

- Click the [+ Create] button again. The new theme will be saved and available to select when configuring a webcast (see the "[Appearance](#)" chapter for more information.)

You can also update, duplicate, delete or set the theme as default using the options in each theme's context menu (see the "[Deleting a Theme](#)" chapter for information about deleting):

- **Update:** opens the chosen theme's edit pane (this is essentially the same as simply clicking the theme in the list).
- **Duplicate:** copies the settings from the chosen theme and creates a new theme with the same settings.
 - The duplicate theme's edit pane will open, allowing you to give it a unique name and modify any of the copied settings.
 - Click the [Duplicate] button in the top right of the page to save the new theme.
- **Set as default:** sets this theme as the default choice when creating new webcasts.
- **Delete:** delete this theme from the list.
