

Deleting a Theme

You can delete a theme using the [Delete] button in the context menu of the theme you wish to delete. (If you only have one theme, you cannot delete it.)

If your theme is not in use by any webcasts, you will be presented with a simple confirmation dialog. Click the [Delete] button to confirm.

If your theme is in use by any webcasts, the confirmation dialog will let you select another theme for those webcasts to use instead. Once you've chosen, click the [Delete] button to confirm.
