

# Webcast Release Notes

## [New documentation portal available](#)

Aaron Chiang posted on Jan 29, 2024

We're excited to announce that we're moving to a new and improved documentation portal in February 2024.

This portal will offer a more streamlined, user-friendly experience, making it easier than ever to find the information you need.

To access our new portal, please click this [link](#).

## [Improved private events' role assignment and error messages](#)

P Team posted on Nov 17, 2023

Role assignment in private Webcasts is now reflected to roles previously granted at the account level.

This means that you can no longer select a role for a user beyond the role granted by the administrator.

For more information, please consult [this article](#).

In addition, some extra error messages were added to the bulk import of the SSO registration attributes.

For more information, please consult [this article](#).

## [Webcast Manager: Event Editors can only assign roles previously granted at the account level](#)

Aaron Chiang posted on Nov 15, 2023

Some restrictions have been applied to the assignment of roles to users in private Webcasts.

From now on, for example, a user assigned an Editor role by the administrator can only be assigned the Editor role at the event level.

For more information, please consult this [article](#).

## [Webcast Manager: Bulk import of SSO/registration attributes](#)

Aaron Chiang posted on Nov 03, 2023

You can now import large numbers of attendees to your events without having to enter each email address or UUID manually.

You can do this by importing a CSV file containing e-mail addresses or UUIDs directly to Webcast Manager.

For more information about the bulk import, please consult this [article](#).

## [Webcast Manager: vBrick integration available](#)

Aaron Chiang posted on Oct 30, 2023

You can now enable RAMP technologies for peer-to-peer eCDN distribution in Webcast Manager if you are a partner-level customer.

This feature helps distribute your webcasts more efficiently and reliably and may reduce bandwidth costs.

To learn more about how to enable RAMP technologies, consult this [article](#).

## [Webcast Manager: Permitted UUIDs enabled for event access](#)

Aaron Chiang posted on Oct 27, 2023

To further facilitate Webcast event access for authorized users, you can now provide permitted UUIDs in Webcast Manager.

This enables employees to sign in to Webcasts using SSO based on their internal UUIDs.

For more information, please consult this [article](#).

## [Webcast Manager: Maximum duration of stream limited to 13 hours](#)

Aaron Chiang posted on Sep 04, 2023

Webcast streams are now limited to 13 hours (12 hours event duration + 1 hour buffer). After this time, the stream will automatically disconnect.

The counter is reset when you restart the stream (publish the RTMP signal).

To change the duration, navigate to the [Configuration](#) panel in the Webcast Manager and select the desired duration from the drop-down menu.

#### Webcast Manager: Webcast Owner now visible in event list

Aaron Chiang posted on Aug 01, 2023

To help administrators have an overview of Webcast owners, the event owner name is displayed in the event list.

For more information about when the event owner name is displayed, please consult this [article](#).

#### Webcast Consumer: sign languages and new layout available

Aaron Chiang posted on May 17, 2023

Webcast Consumer now supports sign languages for English and German, in addition to the existing language sets.

You can learn how to add these languages in [this WebcastManager article](#); a complete list of the supported languages can be found [in a related article](#).

As well, new layout is now available in Webcast Consumer: "Player with Language Selection". If enabled, viewers will only see the player and can choose their preferred language directly within the player.

For more information about other available layouts in Webcast Consumer, consult this [article](#).

#### Webcast Manager: Watermark feature now available in Webcast Manager

Aaron Chiang posted on Apr 27, 2023

You can now protect Webcast content with by enabling watermarks containing the user ID of the employee streaming the content in Webcast consumer.

Available for SSO-enabled Webcasts, this dynamic overlay helps prevent unauthorized sharing, ensuring your content is secure and traceable.

More information can be found in this [article](#).

#### Webcast Manager: Download of viewer statistics report

Aaron Chiang posted on Apr 26, 2023

You can download both analytics reports directly from Webcast Manager or from your analytics account, if your account is enabled for analytics.

If you do not have analytics enabled, you can still download from the basic report from Webcast Manager in the Customer tab.

Note that for private Webcast events, only the creator of the Webcast event and users assigned the role of event editor can [access](#) viewer statistics within the WebcastManager.

For more information on how to download viewer statistics, consult this [article](#).

#### Webcast Manager: Enhanced access control for Webcast Manager

Aaron Chiang posted on Feb 15, 2023

In Webcast Manager, you can now create public and private accounts at the customer level.

With a private account, you can create private events that are not visible to anyone else.

In these private events, you can also assign roles to members of your organization.

For detailed information about enhanced access control, please consult this [article](#).

#### Webcast Manager: HMAC token authentication available

Aaron Chiang posted on Jan 23, 2023

To ensure that only authorized users can access Webcast events, you can enable the use of HMAC (hash-based message authentication code) tokens for user authentication.

For more information, please consult this [article](#).

#### Webcast Manager: Wildcards supported for SSO group names

Aaron Chiang posted on Jan 11, 2023

To facilitate Webcast event access for SSO groups and ensure flexibility in permission assignment, you can use wildcards for SSO group names to include a larger user group.

For more information, please consult this [article](#).

#### Webcast Manager: corporate identity font upload available

Aaron Chiang posted on Nov 30, 2022

Your corporate identity (CI) typeface can now be uploaded to Webcast Manager for further customization of your Webcast event page.

Specifically, it can be uploaded to a Webcast [theme](#) that is applied to your Webcast Consumer page.

These font formats are supported: TTF, ORF, and WOFF.

Please [reach out](#) to our Professional Services team if you want to upload a custom CI font to your Webcast event.
