

# Dynamic File Downloading & File Protection - Beta Version Available

An update to the movingimage Platform is now available to any customer who wishes to try out some new features in our file system. The features described in the documentation [here](#) effect any type of file asset available in the Platform (i.e. videos, thumbnails, chapter thumbnails, attachments, subtitles, etc). If you would like to try this beta, please contact our [Professional Services](#) team.

As this is a beta update, we ask that you be aware of the possibility of encountering bugs. Please do let us know if you experience any problems.
