

# Deleting Attachment Types

To delete video or channel attachment types:

1. Select the attachment type you want to delete in the video or channel attachments list.
2. Click the trash can icon. A confirmation prompt will appear.

If the attachment type you're trying to delete has already been associated with files, the confirmation prompt will list how many. If you proceed with deleting the attachment type in this case, all the files associated with it will also be deleted.

3. If you're sure, click the "Delete" button. The attachment type will be deleted.
