

# Searching for Videos

## Description

You can use the VMPro's search function to search for specific videos by video titles, IDs, descriptions, chapters and overlays.

You can use the basic search function, or you can add filters to further refine your search.

**i** Searches and filters can now contain special characters, such as "@", "#", "!".  
As well, the search function is no longer case-sensitive.

## Basic Search

To search for a video, simply enter a search term in the video toolbar. The results will be displayed in the video list.

## Search by channel name

You can also search for videos using by channel name. If you enter the channel name in the search bar, you will be shown videos from that channel. As well, other relevant videos based on the metadata will be displayed in the results.

## Search by filename

You can also search for a video by using its original filename. Sometimes, a video may have been renamed; you can search for this video using its original filename.

**i** Note that the file name may not always correspond to the video's current title. You can find the filename in the metadata section of the video.

If the video title is now "Example Video" but its filename is "example\_video", you will be shown the desired video when you search for "example\_video".

## Filters

Filtering can be done by title, description or uploader. You can also use substrings (parts of a word or phrase) in your search query.

1. To set up a filter, click on the the [  Add Filter ] button:

The screenshot shows the VMPro interface. At the top, there is a green header with the 'movingimage' logo on the left and the user email 'elisabeth.walters@acme.com' and 'Last Login: 27/09/2021 15:56' on the right. Below the header is a navigation menu with 'All Videos', 'Channels', and 'Trash'. The main content area features a toolbar with icons for 'Check', 'Upload', 'Settings', 'Duplicate', and 'Delete'. A search bar contains the text 'Search: title, description ...' and an 'Add Filter' button. Below the search bar, there is a video list showing '460 Videos' and a pagination control with '1', '2', '3', and '16'. The selected video is 'Welcome Video\_480p.mp4', which has a duration of '00:16' and a 'Not released' status. The video player shows a preview with a green background and a blue checkmark icon.

2. Choose the filter type you would like to create:

3. In the filter edit area, enter your keywords for the video into the field. You can further refine your search results by using multiple filter fields or filter types.

<p><b>Title</b></p> <div data-bbox="169 947 882 1424"> <p>Title: ▾ ×</p> <hr/> <p>Contains all of <input type="text"/> ×</p> <p>Contains one of <input type="text"/> ×</p> <p>Does not contain <input type="text"/> ×</p> <p>Discard Changes View Results</p> </div>	<ul style="list-style-type: none"> <li>• <b>Contains all of:</b> Use this field to search for specific words, regardless of order.</li> <li>• <b>Contains one of:</b> Use this field to search for multiple single-word options at once (for example, if you search for "Welcome to moving image" it will search for videos that have any one of those words)</li> <li>• <b>Does not contain:</b> Use this field to exclude words from your search</li> </ul>
<p><b>Description</b></p> <div data-bbox="169 1559 882 2036"> <p>Description: ▾ ×</p> <hr/> <p>Contains all of <input type="text"/> ×</p> <p>Contains one of <input type="text"/> ×</p> <p>Does not contain <input type="text"/> ×</p> <p>Discard Changes View Results</p> </div>	<ul style="list-style-type: none"> <li>• <b>Contains all of:</b> Use this field to search for specific words, regardless of order.</li> <li>• <b>Contains one of:</b> Use this field to search for multiple single-word options at once (for example, if you search for "Welcome to moving image" it will search for videos that have any one of those words)</li> <li>• <b>Does not contain:</b> Use this field to exclude words from your search</li> </ul>

- **Is one of:** Choose the name of an uploader you'd like to include in this search
- **Is not one of:** Choose the name of an uploader you'd like to exclude from this search

You can search by current users and deleted users in your VideoManager Pro account. Specifically, use the first names and e-mail addresses of the uploader of the video.

- **Is one of:** Choose the name of an assigned person you'd like to include in this search
- **Is not one of:** Choose the name of an assigned person you'd like to exclude from this search

You can search both current users and deleted users in your VideoManager Pro account.

4. When finished, click [ View Results ].

To delete a filter, click the [ X ] next to the filter's name. To delete all filters at once, click the [  Add Filter ] button again, and then click "Clear all Filters". Alternatively, you can just delete the search entirely.
