

Firewall Domains and Ports

This list is updated on a regular basis. If you still experience problems with the following domains, contact [Professional Services](#).

As well, if you use custom domain handling, some of the host names listed below may vary.

If you are having problems with your firewall blocking access to the movingimage EVP, you may need to whitelist the following domains and ports:

Service	Type	Hosts	Protocol /Port	Content Types
Platform				
Microservice authentication	Authentication	login.movingimage.com	https:443	
CorporateTube				
Custom subdomain	Web application	*.corporate.tube	https:443	
Custom file storage	Static files	static.corporate.tube	https:443	
Custom assets storage	Assets	ct-assets-prod.corporate.tube	https:443	
Webcast				
Webcast main	Web application	webcast.movingimage.com	https:443 websocket:443	
Webcast assets	Assets, Images, Static files	mi-wbc-asset.akamaized.net	https:443	
Webcast Live Streaming	Streaming (Live, Adaptive Streaming)	wbc-live-cdn.edge-cdn.net	https:443	
Webcast Live Streaming	Streaming (Live, Adaptive Streaming)	livesegmented-i.akamaihd.net	https:443	
Webcast Live Entrypoint	Stream Publish (Primary)	streaming-prod.edge-cdn.net	rtmp:1935	
Webcast Live Entrypoint	Stream Publish (Backup)	wow-backup.movingimage.com	rtmp:1935	
Video Conference Connector		vc.movingimage.com px01.vc.movingimage.com	sip h323	
VideoManager Pro				
VMPRO video management User Interface	Web UI	vmpro.movingimage.com	https:443 websocket:443	
Private API	REST API	api.video-cdn.net	https:443	
Asset Upload Endpoint	Asset Inbound	asset-in.video-cdn.net	https:443	
Akamai-hosted assets	Asset Outbound	asset-out-cdn.video-cdn.net	https:443	
FTP Upload	FTP	ftpingest.video-cdn.net	ftp:21 ftps:990,989	
Player				
Video analytics	Analytics (VMPro-Statistic)	c.video-cdn.net	https:443	
Video analytics	Analytics (View tracking for Akamai)	ca.video-cdn.net	https:443	
Video playout	REST API	d.video-cdn.net	https:443	text/json
Video Player	Player UI	e.video-cdn.net	https:443	html, js
Hosted assets	Asset Outbound	asset-out-cdn.video-cdn.net	https:443	video/mp4
Hosted VOD	VOD streaming	http://vod.video-cdn.net	https:443
