## **Channels**

Your organization's CorporateTube administrator sets up channels, which are lists of videos related by subject or theme. Channels can be named according to different departments or intended use. Sub-channels can be created under each channel to further categorize videos.

To access sub-channels, click the main channel name in the navigation bar and select an option from the dropdown menu. From there, you can sort videos by plays, rating, upload date, or title.

①

If you hover with your mouse over a thumbnail of a video in a video list, you can already see a small preview of the video.
