

Video Attachments

For some videos in your organization's CorporateTube, your administrator may attach files. This makes it easy to share information throughout your organization—for example, an internal training video might have a handout attached to it, or a video about a new product might include the user guide as an attachment.

If a video has attachments, they will show up as a tab in the description box, next to the "Comments" tab. Click the "Attachments" tab to see a list of all files attached to the video, then click the name of an attachment to download the file to your desktop.
