# Favourite Videos

"Favourite Videos" is only available for internal CorporateTube accounts that use Single Sign-on (SSO).

While browsing your company's video portal, you may find several videos you'd like to save for future reference. CorporateTube's pin feature allows you to save these videos together in a list, to make it easier to find them all in one place later. This list is called the "Favourite videos" list.

To "pin" or save a video to this list, click the pin icon in the description box beneath the video you'd like to save. The button will be highlighted, to show that the video has been saved, and a success message will be displayed. To "unpin" or remove a video from the list, click the pin button again to un-highlight.

To access the "Favourite videos" list, click your name in the control bar at the top of the page and select it from the drop-down menu.
