

# Downloading a Video

In general, you can only download videos that have been previously released (see section "[Releasing a Video for Download](#)"). However, you may be able to download unreleased videos if your administrator has [assigned](#) the "Download Video" permission to your role.

To download a video file, follow these steps:

1. First, highlight the entry with the video in the video list which you want to download.
2. Open the accordion menu **Video Formats** in the editing area. All available formats of the video and its corresponding resolution are listed here.

Video Formats		
ORIGINAL	SIZE	
video/quicktime	92.8 MB	
AVAILABLE FORMATS		RESOLUTION
108p (vp8) WEBM		192 x 108
108p (h.264) MP4		192 x 108
288p (vp8) WEBM		512 x 288

3. At the top of the list, the original format is displayed. If you click on the -symbol, all available data to the source file is represented.
