

Setting up a Security Policy

To create a globally-applicable security policy, proceed as follows:

1. In the navigation pane, click the "Security Policies" entry.
2. To create a new security setting, click the [Create] button at the top of the security policies list.

The screenshot shows the MovingImage application interface. The top green header bar contains the 'movingimage' logo on the left and the user information 'elizabeth.walters@acme.com - Last Login: 02/07/2019 13:47' on the right. A left-hand navigation pane lists several menu items: 'Account', 'Users', 'Roles', 'Security Policies' (which is highlighted), 'Video Metadata', and 'Channel Metadata'. In the main content area, there is a 'Create' button with a plus icon. A modal dialog box is open in the center, titled 'Security Policy Name'. It features a text input field with the placeholder text 'Please enter a name.', a 'Cancel' button, and a blue 'Create' button.

3. In the dialog box that opens, type the name of the security setting.
4. Finally, click on the [Create] button. The entry will immediately appear in the list of security settings. Now you can set additional parameters (see chapter "[Security Policy Configuration](#)").
