

Groups

Each video is assigned to a group. Manage your groups here to organize each user's rights to videos in a group. Rights are assigned through the use of roles, which are applied to the user here in group management (see also the ["Assigning a User to a Role"](#) chapter).

The "Company" group acts as a master group and cannot be deleted; every user is automatically assigned to the "Company" group and cannot be removed. Create additional groups to classify users in more detail.
