

Creating a Role

To create a new role, proceed as follows:

1. Click the "Roles" entry in the navigation pane.
2. Click the [Create] button at the top of the list of roles. This will open the dialog for creating a new role.

The screenshot shows the VideoManager Pro application interface. On the left is a navigation pane with a green header bar labeled "VideoManager Pro". The navigation pane contains five items: "Account" (with a list icon), "Users" (with a person icon), "Roles" (with a key icon and highlighted in grey), "Security Policies" (with a shield icon), and "Custom Metadata Fields" (with a tag icon). The main content area on the right displays a "Create" button with a plus icon. Below this is a form titled "Role Name" with a text input field containing the placeholder text "Please enter a name.". At the bottom of the form are two buttons: "Cancel" (grey) and "Create" (blue).

3. Enter the role name and then click the [Create] button. This creates the new role and immediately adds it to the list of all roles.
4. Enter the required settings for the new role (see chapter ["Editing a Role"](#)).
