

# Releasing a Video for Download

If you want to allow your viewers to download a video, you must release the video for download.

1. Select the desired video in the video list by clicking on the appropriate entry.
2. Open the **Security** accordion menu.

The screenshot shows a 'Security' settings panel with a blue header. It contains several sections: 'Video release' with a toggle switch and a clock icon; 'Download release' with a yellow-highlighted toggle switch; 'Timer for deletion' with a clock icon; 'Security Policy' with a dropdown menu set to 'Global setting'; 'Group' with a dropdown menu set to 'Company'; and 'Access Profile' with a dropdown menu set to 'Global setting'.

3. To release the video for download, activate the "Download release" slider.
