

Deleting a Security Policy

A security policy can only be deleted if it is not currently in use or defined as global security policy.

To delete a security policy, perform the following steps:

1. Select the entry in the list of security policies that you want to delete.
2. Then, click the [Delete] button at the top of the list. A confirmation dialog box opens.

The dialog box has a title bar with the text "Delete security policy" and a close button (X) on the right. The main content area contains the question "Do you want to delete the selected security policy?". At the bottom right, there are two buttons: "Cancel" and "Delete". The "Delete" button is highlighted in blue.

3. Confirm with the [Delete] button. The security policy is deleted.
4. If the selected security policy is still in use or has been defined as global security policy, it cannot be deleted. In the appropriate warning dialog, click the [Cancel] button. The delete action is canceled.

The dialog box has a title bar with the text "Deletion of the security policy is not possible" and a close button (X) on the right. The main content area contains the message "The selected security policy is currently defined as global security policy.". At the bottom right, there is a single button labeled "Cancel".
