

Supported File Formats for Attachments

While VMPPro enables you to attach files to your video, not all file formats can be uploaded as attachments.

Note that file formats containing macros **cannot** be uploaded to VMPPro.

This is an security measure to prevent malicious file uploads.

This article lists the specific file formats that can be uploaded to your VMPPro instance.

Supported file formats

The following text file formats can be uploaded:

Allowed text file formats
.txt
.vtt
.srt
.xml

UTF-Encoding

Only UTF-8 encoding is supported for the subtitle files .vtt and .srt.

The following image file formats can be uploaded:

Allowed image file formats
.gif
.jpeg
.jpg
.png
.svg
.tiff

The following Microsoft Office file formats can be uploaded as attachments:

Allowed Microsoft Office file formats
