

# Third-party polling and surveys

## Introduction

Integration of third-party polling and surveys is now available in Webcast.

They can be enabled in the Webcast Manager.

## Create a poll or survey

First, create a third-party poll using a third-party application such as Google Forms or Survey Monkey.

Once the poll or survey is published, copy the URL of the poll or survey.

## Paste the URL in the Webcast Manager

Then, log in to the Webcast Manager.

After logging in and creating an event, navigate to the *appearances* tab.

Then scroll down to the Polls and Surveys section.

Here, paste the link of the third-party poll or survey you created.
