

Webcast Manager: corporate identity font upload available

Your corporate identity (CI) typeface can now be uploaded to Webcast Manager for further customization of your Webcast event page.

Specifically, it can be uploaded to a Webcast [theme](#) that is applied to your Webcast Consumer page.

These font formats are supported: TTF, ORF, and WOFF.

Please [reach out](#) to our Professional Services team if you want to upload a custom CI font to your Webcast event.
