

# New Player Highlights

Note: The product should only be used for pilot beta testing and is not designed to support production. At initial pilot launch, we will initially support a limited number of the features.

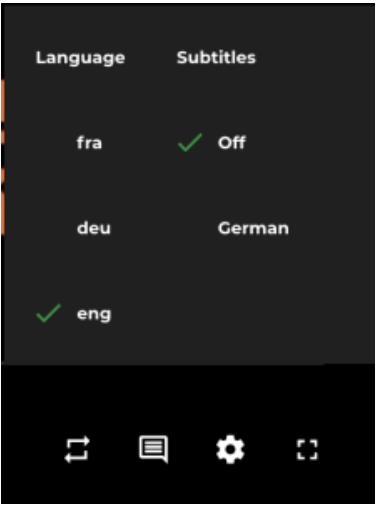

## New Player onscreen elements

Consult the screenshot below for the onscreen elements available in the new player.

Number	Description
1	Play/Pause button (overlay)
2	Play/Pause button
3	Volume
4	Current time display   video duration
5	Loop
6*	Toggle audio stream in a different language or subtitles
7	Quality, speed settings
8	Full screen mode

\*By clicking on the text box symbol, you will see both options for the audio language and subtitles:

Please note that currently only language codes can be displayed, while custom labels cannot be shown due to existing limitations. We are actively working on resolving this issue, and custom labels are scheduled to be included in the next player release.

### Keyboard shortcuts

To ensure player accessibility, each of the following keyboard shortcuts is accompanied by a specific interaction feedback.

Here, the feedback takes the form of an icon:

Keyboard shortcuts		
Up arrow	Volume up by 10%	
Down arrow	Volume down by 10%	
Left arrow	Rewind by 5 seconds	
Right arrow	Forward by 5 seconds	
j	Rewind by 10 seconds	
l	Forward by 10 seconds	
m	Mute	
m	Unmute	
f	Enter/exit full-screen mode	
Space bar	Pause video	
Space bar	Play video	

### Viewport Breakpoints

As well, the player is responsive to screen sizes and control buttons will be shown or hidden based on the viewports.➤

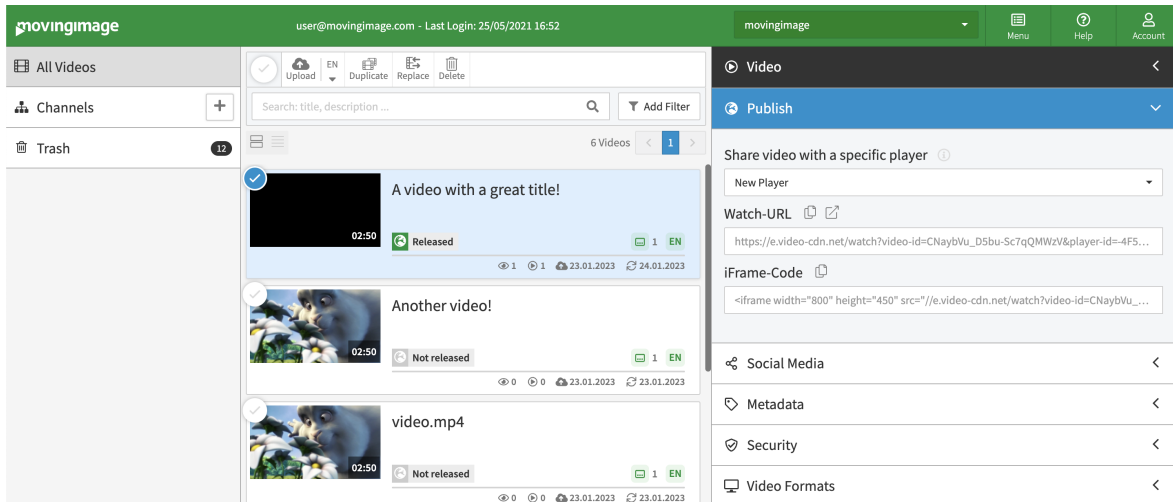

Viewport Breakpoints	
Larger than 640 x 480px	Show all controls
Larger than 480 x 270px	Hide Skip buttons

Larger than 200 x 200px	Hide volume and subtitles (if not available)
Equal to 200 x 200px (min screen size)	Hide settings and subtitles

## Share URLs

Once a video has been [released](#), you can share the video with the new player.

Navigate to the [Publish](#) tab in your VideoManager Pro account to see the Share-URL and iFrame embed code.

## Steps - Create and use a new player

- In your VideoManager Pro account, navigate to the Player Generator (visible only with administrator access). This is found on the top right corner under Menu.
- In the player generator, click on the  symbol next to **All Players** to create a new player.
- Select a player skin template and give the player a name. Then, select the option "Use New Player":

- Click on the different elements found within the player.
