

My Videos

"My videos" is only available for internal CorporateTube accounts that use Single Sign-on (SSO).

The My Videos area lists all the videos that you, personally, have uploaded to your organization's CorporateTube. From here you can jump to editing or deleting videos you've uploaded. You can edit descriptions and keywords, as well as video titles and adding or removing channels the video is associated with.

Note: You can also see videos that you haven't uploaded personally, but for which you got assigned to be the ["Person in charge"](#). These videos will be highlighted in the video list with a little icon in the top left corner of a thumbnail that shows "In charge of video" when you hover over it. This helps to distinguish between videos you uploaded and videos you got assigned to.

Use the arrows to navigate through the videos of "My videos" with your account.

To edit or delete a video, click the triple-dot icon beneath your desired video. Select either "Edit" or "Delete".

- If you edit a video, you will be brought to the [editing page](#).
- If you select delete, a warning dialog will pop up. Click "Delete" to delete the video.
